

Annulus AI — Outreach Target Labs

Date: 2026-06-24 **Institutions:** Stanford · Columbia · University of Utah (~25 labs each)

Target profile: labs that (1) generate lots of tabular/spreadsheet experimental data, (2) are sensitive about data privacy/IP (clinical, patient, or proprietary data), and (3) have non-programmer members who currently wrangle data in Excel. **Tier 1** = lead with these (privacy pitch lands hardest). **Tier 2** = good fit, pitch the "Excel replacement for non-programmers" angle.

Verify before sending. Every PI and URL below was found via live web research, but: (a) `medicine.utah.edu` / `uofuhealth.utah.edu` and a few Stanford/Columbia pages block automated fetchers (HTTP 403 ≠ dead link), (b) a handful of links are faculty-profile or division pages rather than dedicated lab sites, and (c) some senior PIs should be confirmed as actively running a lab. Do a 30-second manual check of each name, title, and page before emailing. Inline flags note the specific ones.

Stanford (25)

#	Lab (PI)	Dept / Institute	Why it fits	Tier	URL
1	McLaughlin Lab — Tracey McLaughlin, MD	Endocrinology / Diabetes Research Center	Human metabolic phenotyping; patient data	1	https://mclaughlinlab.stanford.edu/
2	Engleman Lab — Edgar Engleman, MD	Pathology / Cancer Institute	CLIA flow cytometry on patient samples; trials	1	https://med.stanford.edu/englemanlab/about-us.html
3	Woo Lab — Y. Joseph Woo, MD	Cardiothoracic Surgery / CVI	Translational heart-failure + surgical-outcome data	1	https://med.stanford.edu/woolab.html
4	Mackall Lab — Crystal Mackall, MD	Pediatrics/Medicine — Cancer Cell Therapy	CAR-T functional + early-phase trial data	1	https://med.stanford.edu/mackalllab.html
5	Jaiswal Lab — Siddhartha Jaiswal, MD, PhD	Pathology / Hematology	Clonal hematopoiesis; patient specimens + outcomes	1	https://www.jaiswallab.org/
6	Blish Lab — Catherine Blish, MD, PhD	Medicine — Infectious Diseases	Patient viral-immunity samples; NK-cell assays	1	https://med.stanford.edu/blishlab.html
7	Jagannathan Lab — Prasanna Jagannathan, MD	Infectious Diseases	Malaria vaccine/therapeutic trial + immune data	1	http://med.stanford.edu/jagannathan-lab.html
8	West Lab — Robert West, MD, PhD	Pathology	Tumor molecular profiling + clinical correlates	1	https://med.stanford.edu/west.html
9	Howitt Lab — Brooke Howitt, MD	Pathology (gyn)	Patient case-series / histopath cohorts (<i>disambiguate from M. Howitt</i>)	1	https://med.stanford.edu/brookehowittlab.html
10	Seung Kim Lab — Seung K. Kim, MD, PhD	Developmental Biology / Diabetes Center	Islet-function assays; human-islet data	1	https://seungkimlab.stanford.edu/
11	Rabinovitch/Bland Lab — Marlene Rabinovitch, MD	Pediatric Cardiology / CV Research	PAH hemodynamic + patient-cohort + trial data	1	https://med.stanford.edu/rabinovitchbland
12	Spiekerkoetter Lab — Edda Spiekerkoetter, MD	Pulmonary & Critical Care	PAH/HHT bench + patient translational data	1	https://med.stanford.edu/spiekerkoetterlab.html
13	Longo Lab — Frank Longo, MD, PhD	Neurology & Neurological Sciences	Neurodegeneration assays + Phase 2a trial data	1	https://med.stanford.edu/longo-lab.html
14	Winn Lab — Virginia Winn, MD, PhD	OB-GYN / Maternal-Fetal Medicine	Placental assays + pregnancy patient samples	1	https://obgyn.stanford.edu/divisions/reproductive_bio1.html
15	Bollyky Lab — Paul Bollyky, MD, PhD	Infectious Diseases / M&I	Phage + chronic-infection patient samples	2	http://bollykylab.com/
16	Felsher Lab — Dean Felsher, MD, PhD	Oncology / Cancer Institute	Oncogene mouse models; tumor-regression time-courses	2	https://med.stanford.edu/felsherlab.html
17	Rohatgi Lab — Rajat Rohatgi, MD, PhD	Oncology / Biochemistry	Hedgehog signaling; biochem assay + screen data	2	http://rohatgilab.stanford.edu/
18	Artandi Lab — Steven Artandi, MD, PhD	Hematology / Biochemistry	Telomere/stem-cell assays (<i>confirm lab URL</i>)	2	https://med.stanford.edu/hematology.html

#	Lab (PI)	Dept / Institute	Why it fits	Tier	URL
19	Monack Lab — Denise Monack, PhD	Microbiology & Immunology	Infection models; bacterial-burden/host-response tables	2	http://monacklab.stanford.edu/
20	Amieva Lab — Manuel Amieva, MD, PhD	Microbiology & Immunology	Host-microbe quantification tables	2	http://amievalab.stanford.edu/
21	Galli Lab — Stephen Galli, MD	Pathology	Mast-cell/innate-immunity assay + animal data	2	http://med.stanford.edu/gallilab.html
22	Kobilka Lab — Brian Kobilka, MD	Molecular & Cellular Physiology	GPCR binding-assay/biophysics; drug-target IP	2	https://med.stanford.edu/kobilkalab.html
23	Wysocka Lab — Joanna Wysocka, PhD	Chemical & Systems Biology	Gene-regulation benchwork (<i>target non-CS members</i>)	2	https://wysocka.stanford.edu/
24	Du Bois Lab — Justin Du Bois, PhD	Chemistry / Chemical Biology	Synthesis yields + assay/ephys; compound IP (<i>URL 403, verify</i>)	2	https://duboislab.stanford.edu/
25	Giocomo Lab — Lisa Giocomo, PhD	Neurobiology / Wu Tsai	Behavioral + electrophysiology tables (animal)	2	https://giocomolab.weebly.com/

Backups: Sonnenburg (microbiome), Parsonnet (ID/epi), Brunet (genetics), Krasnow (lung), Stevenson (neonatology), Daldrup-Link (peds imaging), Hsueh (reproductive), Bhalla (nephrology). Excluded (too computational): Montgomery, Curtis, Alizadeh, Ji; ChEM-H med-chem (uses Dotmatics); Bhatt (large CS team).

Columbia / CUIMC (25)

#	Lab (PI)	Dept / Institute	Why it fits	Tier	URL
1	Han Lab — Arnold Han, MD, PhD	Translational Immunology (CCTI)	TCR-seq + phenotype from patient cancer/autoimmune samples	1	https://www.vagelos.columbia.edu/departments-centers/columbia-center-translational-immunology-ccti/research/ccti-research-labs/han-lab
2	Crew — Breast Cancer Prevention — Katherine Crew, MD	Medicine / Epidemiology (HICCC)	Clinical-trial data, biomarkers; HIPAA-sensitive	1	https://www.cancer.columbia.edu/profile/katherine-d-crew-md
3	Olive Lab — Kenneth Olive, PhD	HICCC	Preclinical pancreatic drug trials; tumor/PK-PD tables	1	https://www.olivelab.org/
4	Farber Lab — Donna Farber, PhD	Surgery / M&I	Human-tissue immunophenotyping (flow, CITE-seq)	1	https://farberlab.org/
5	Izar Lab — Benjamin Izar, MD, PhD	Medicine (Hem/Onc) / HICCC	Patient melanoma single-cell + clinical metadata	1	https://www.izarlab.com/
6	Schwabe Lab — Robert Schwabe, MD	Medicine — Digestive & Liver Disease	Liver-cancer/fibrosis mouse + patient-sample assays	1	https://schwabelab.org/
7	Nakagawa Lab — Hiroshi Nakagawa, MD, PhD	Medicine / HICCC	Esophageal patient-derived organoid drug-response	1	https://www.cancer.columbia.edu/nakagawa-lab
8	Lentzsch Lab — Suzanne Lentzsch, MD, PhD	Medicine — Myeloma & Amyloidosis	Myeloma bench + investigator-initiated trials	1	https://www.vagelos.columbia.edu/departments-centers/hematology-oncology/research/research-labs-programs/multiple-myeloma-and-amyloidosis-program-columbia
9	Amengual Lab — Jennifer Amengual, MD	Medicine — Lymphoid Malignancies / HICCC	Lymphoma cytotoxicity/PK-PD + early-phase trials	1	https://www.cancer.columbia.edu/research/laboratories/amengual-lab
10	Mapara Lab — Markus Mapara, MD	Medicine — BMT & Cell Therapy	Transplant patient cohorts + GVHD models	1	https://www.vagelos.columbia.edu/departments-centers/centers-and-initiatives/columbia-center-stem-cell-therapies/our-research-team/mapara-lab
11	Muranski Lab — Pawel Muranski, MD	CCTI / Hem-Onc	Patient-derived T-cell adoptive-therapy data	1	https://www.vagelos.columbia.edu/departments-centers/columbia-center-translational-immunology-ccti/research/research-labs/muranski-lab
12	Uhlemann Lab — Anne-Catrin Uhlemann, MD, PhD	Medicine — Infectious Diseases	Patient cohort + microbiology resistance data	1	https://www.infectiousdiseases.cuimc.columbia.edu/research/research-labs/uhlemann-lab
13	Ferrante Lab — Anthony Ferrante, MD, PhD	Endocrinology / Naomi Berrie	Adipose immunology; mouse+human metabolic data	1	https://www.ferrantelab.org/
14	Pajvani Lab — Utpal Pajvani, MD, PhD	Endocrinology / Naomi Berrie	NASH/diabetes; human liver-biopsy data	1	https://www.pajvanilab.com/
15	Korner Lab — Judith Korner, MD, PhD	Endocrinology / Weight Control Center	Bariatric patient hormone/outcome data; HIPAA	1	https://www.vagelos.columbia.edu/departments-centers/naomi-berrie-diabetes-center/research/our-researchers/judith-korner-md-phd

#	Lab (PI)	Dept / Institute	Why it fits	Tier	URL
16	Shimada Lab — Yuichi Shimada, MD, MPH	Cardiology	HCM patient biomarker + genetic data	1	https://www.columbiacardiology.org/research-labs/shimada-lab
17	Reyes-Soffer Lab — Gisette Reyes-Soffer, MD	Cardiology	Human lipoprotein kinetic studies; drug-target IP	1	https://www.columbiacardiology.org/research-labs/reyes-soffer-lab
18	Wan Lab — Elaine Wan, MD	Cardiology (electrophysiology)	Per-patient EP/arrhythmia + mouse data	1	https://www.columbiacardiology.org/research-labs/wan-lab
19	Williams Lab — Zev Williams, MD, PhD	OB-GYN — REI / Fertility Center	IVF cycle/genetic-test data; highly sensitive	1	https://www.obgyn.columbia.edu/research-labs/williams-lab
20	Acharyya Lab — Swarnali Acharyya, PhD	Pathology / Cancer Genetics	Metastasis models; biomarker/drug-response tables	2	https://www.pathology.columbia.edu/profile/swarnali-acharyya-phd
21	Kousteni Lab — Stavroula Kousteni, PhD	Physiology / Evans MDS Center	Marrow-niche; mouse + patient MDS/AML samples	2	https://www.cancer.columbia.edu/kousteni-lab
22	Passegué Lab — Emmanuelle Passegué, PhD	Genetics & Dev / Stem Cell Initiative	HSC flow-cytometry/functional bench data	2	https://www.stemcell.columbia.edu/research-labs/passegue-lab
23	Arpaia Lab — Nicholas Arpaia, PhD	M&I / HICCC	Mucosal immunity; flow + microbiota tables	2	https://arpaialab.nyc
24	Karsenty Lab — Gerard Karsenty, MD, PhD	Genetics & Development (Chair)	Mouse skeletal/endocrine phenotyping; osteocalcin IP	2	https://www.genetics.cuimc.columbia.edu/research-labs/karsenty-lab
25	Colecraft Lab — Henry Colecraft, PhD	Molecular Pharmacology & Therapeutics	Patch-clamp + dose-response; patentable modulators	2	https://www.pharmacology.cuimc.columbia.edu/research/colecraft-lab

Backups: Hachung Chung (innate immunity), Haeusler (metabolism), Bendesky / Polleux / Salzman / Siegelbaum (Zuckerman neuroscience), Sykes & Reshef (CCTI transplant), Lovinsky-Desir (peds pulm), Barasch (nephrology). Flags: Dalla-Favera & Adam Mor (verify active / exact lab page). Excluded as departed: Bruno (→Oxford), Nickolas (→WashU).

University of Utah (25)

#	Lab (PI)	Dept / Institute	Why it fits	Tier	URL
1	Welm Labs — Alana & Bryan Welm, PhD	Huntsman Cancer Institute	~180 PDX/organoid models + patient clinical metadata	1	https://uofuhealth.utah.edu/huntsman/labs/welm-labs
2	Buckley Lab — Shannon Buckley, PhD	Huntsman / Hematologic Malignancies	Leukemia assays on patient blood/marrow	1	http://sbuckleylab.org/
3	Gordts Lab — Philip Gordts, PhD	Pathology / Eccles Genetics	Metabolic phenotyping + human translational (<i>new lab — early adopter</i>)	1	https://philipgordts.com/
4	Bray Lab — Paul Bray, MD	Internal Medicine — Hematology	Platelet/thrombosis genotype-phenotype + patient cohorts	1	https://medicine.utah.edu/internal-medicine/hematology/labs/bray
5	Rondina Lab — Matthew Rondina, MD	Internal Medicine / Pathology	Sepsis/infection patient inflammatory-marker cohorts	1	https://bioscience.utah.edu/faculty/rondina/index.php
6	Lamb Lab — Tracey Lamb, PhD	Pathology — M&I	Malaria parasitemia/cytokine + pediatric cohort data	1	https://medicine.utah.edu/pathology/research-labs/tracey-lamb
7	Leung Lab — Daniel Leung, MD, MSc	Infectious Diseases	Global-health serosurveillance + patient cohorts	1	https://www.globalguthealth.org/
8	Snyder Lab — Eric Snyder, MD, PhD	Pathology / Huntsman	Lung/pancreatic tumor models + patient pathology	1	https://uofuhealth.utah.edu/huntsman/labs/snyder
9	Weiss Lab — Robert Weiss, PhD	Human Genetics (Eccles)	Neuromuscular patient genotype-phenotype data	1	https://www.genetics.utah.edu/research/robert-weiss
10	Fisher Lab — Simon Fisher, MD, PhD	Internal Medicine — Endocrinology (Chief)	Glucose clamp/ECG + hypoglycemia trial data	1	https://discovery.med.utah.edu/people/simon-j-fisher-md-phd/
11	Drakos Lab — Stavros Drakos, MD, PhD	Cardiovascular Medicine / CVRTI	LVAD patient registries + human-tissue molecular data	1	https://discovery.med.utah.edu/people/stavros-g-drakos-md-phd/
12	Summers Lab — Scott Summers, PhD	Nutrition & Integrative Physiology (Chair)	Lipidomics + human metabolic data; therapeutics IP	1	https://www.summersholland.u2m2.utah.edu/
13	Bonkowsky Lab — Joshua Bonkowsky, MD, PhD	Pediatrics — Neurology / Personalized Medicine	Leukodystrophy screens + pediatric clinical data	1	https://bonkowskylab.neuro.utah.edu/research/
14	Carrell Lab — Douglas Carrell, PhD	Surgery / OB-GYN — Andrology & IVF	Sperm methylation + IVF patient data (<i>confirm active, senior</i>)	1	https://medicine.utah.edu/surgery/andrology/research
15	Häcker Lab — Hans Häcker, MD, PhD	M&I / Pathology	Innate-immunity assays + translational drug dev	2	https://www.haeckerlab.org/
16	Round Lab — June Round, PhD	Pathology — M&I	Microbiome abundance + cytokine + mouse tables	2	https://round.path.utah.edu/
17	O'Connell Lab — Ryan O'Connell, PhD	Pathology — M&I (Chief)	miRNA immunology; flow/qPCR/expression tables	2	https://medicine.utah.edu/pathology/research-labs/ryan-oconnell

#	Lab (PI)	Dept / Institute	Why it fits	Tier	URL
18	Matt Williams Lab — Matthew A. Williams, PhD	Pathology — M&I	T-cell memory; flow-cytometry assay data	2	https://medicine.utah.edu/pathology/research-labs/matt-williams
19	Fairfax Lab — Keke Fairfax, PhD	Pathology — M&I	Immunoparasitology B/T-cell + metabolic assays	2	https://medicine.utah.edu/pathology/research-labs/keke-fairfax
20	Holmen Lab — Sheri Holmen, PhD	Surgery / Huntsman (Melanoma)	Melanoma/GBM mouse-model + drug-response	2	https://uofuhealth.utah.edu/huntsman/labs/holmen
21	Cairns Lab — Bradley Cairns, PhD	Oncological Sciences (Chair) / Huntsman	Cancer epigenetics + germline-variant tables	2	https://uofuhealth.utah.edu/huntsman/labs
22	Rutter Lab — Jared Rutter, PhD	Biochemistry (HHMI)	Metabolomics/proteomics matrices; unpublished IP	2	http://rutter.biochem.utah.edu/
23	Shepherd Lab — Jason Shepherd, PhD	Neurobiology	Ephys/Western/behavior; Arc gene-delivery IP	2	https://bioscience.utah.edu/faculty/shepherd/
24	Megan Williams Lab — Megan Williams, PhD	Neurobiology & Anatomy	Synapse/spine quantification + ephys + behavior	2	https://www.neuro.utah.edu/labs/williams/index.html
25	Kishore Lab — Bellamkonda Kishore, MD, PhD	Internal Medicine — Nephrology	Renal water/sodium transport time-courses; therapeutics IP	2	https://medicine.utah.edu/internal-medicine/nephrology/labs/kishore

Backups: Murtaugh & Kardon (Human Genetics), Venosa (pharm-tox), Ramkumar (nephrology), Joss-Moore (neonatology), Mulvey (microbial pathogenesis), Ayer & Edgar (Huntsman basic), Tantin & Thummel (basic — pitch Excel-replacement), Neklason (4,000+ pt hereditary-GI-cancer registry — strong privacy). Excluded as departed: Deininger (→Versiti). medicine.utah.edu / uofuhealth.utah.edu URLs block bots — verify in a browser.

How to prioritize

1. **Lead with a Tier-1 lab at each school**, ideally one where the team already has a connection (warm intros convert far better than cold).
2. **Strongest privacy-pitch targets** = anyone handling patient/clinical/proprietary data (most Tier 1 here). Lead the email with the privacy/IP angle for those.
3. **Personalize the one "why this is relevant to you" sentence** per lab — pull it from the "Why it fits" column.
4. **Start with ~3–5 per school**, measure reply rate, then work down the list.
